Mohamed M'saboue

Engineering Student in Data & AI

mohamedmsb6@gmail.com | +212 610-510183 | Casablanca, Morocco
Mohamed M'saboue | momomsb | Portfolio : msaboue.vercel.app

Education

ENSA El Jadida | Engineering Degree in Computer Science and Emerging Technologies *2024 – Present*

ENSA El Jadida | Integrated Preparatory Program *2022 – 2024*

Lycée El Maarif, Mauritania | Scientific Baccalaureate, Honors (Bien) *2021*

Professional Experience

Attijariwafa bank | Data & AI Intern *Jul. – Sep. 2026*
Casablanca, Morocco

- Designed an **AI-powered technical analysis agent** for the Casablanca Stock Exchange using a ReAct architecture, **LangGraph**, and large language models (LLMs).
- Developed a technical indicator engine (RSI, MACD, EMA, Bollinger Bands) powered by scraped market data stored in **PostgreSQL**.
- Exposed agent capabilities through a **FastAPI** and implemented a **RAG** module with reranking to answer questions about listed companies.

Ministry of Digital Transformation | Full-Stack Developer Intern *Jul. 2025*
Nouakchott, Mauritania

- Developed an internal web application for meeting management to digitize administrative workflows using **Laravel**, **React**, and **MySQL**.

Projects

Alumni ENSAJ – Predictive Analysis of Career Paths
Built a scraping and LLM-based data structuring pipeline, designed a star-schema data warehouse, and developed predictive models for employment outcomes using XGBoost, LightGBM, and CatBoost.
Tech Stack: Python, Selenium, LLMs, PostgreSQL, Scikit-learn, FastAPI, React

StreamETL – Low-Code Real-Time ETL Platform
Designed a visual pipeline builder for real-time streaming data processing powered by Kafka and Spark.
Tech Stack: Python, FastAPI, Kafka, Spark, PostgreSQL, Parquet

Job Market-Based Course and Skill Recommendation System
Analyzed job postings and CVs to recommend relevant skills and training programs aligned with labor market demands.
Tech Stack: Python, Selenium, BeautifulSoup, PyMuPDF, LLMs, MCP Server, Streamlit

Business Intelligence Pipeline – UNICEF HIV Data
Implemented data integration, OLAP modeling, and reporting for HIV monitoring data.
Tech Stack: SQL Server, SSIS, SSAS, SSRS, Excel

Technical Skills

Programming Languages	Python, SQL, Java
AI & LLMs	LangChain, LangGraph, RAG, NLP, Scikit-learn, TensorFlow
Data Engineering	Kafka, Spark, Hadoop, Talend, MSBI (SSIS, SSAS, SSRS)
Databases	PostgreSQL, MySQL, MongoDB
Web Development & DevOps	FastAPI, React, Docker, Git, AWS

Certifications & Languages

- AWS Cloud Foundations (AWS, 2026) · GitHub Foundations (DataCamp, 2026) · Foundations: Data, Data, Everywhere (Google, 2026)
- **Arabic**: Native · **French**: Fluent · **English**: Fluent
